Preface

The training workshops are developed to supplement instructor-led training. The guide is constructed in a way that teaches students the key functionality of the application through practical hands-on workshops. Each workshop details tasks that the student is required to complete. The workshops build on each other to help ensure a comprehensive understanding of the application is achieved at the completion of the course. Space is provided at the end of each workshop for learning checks and student notes.

Symbol Library

Note

A note for participants about the task

Important Reminder

An important reminder for the participant about the task.

Learning Check

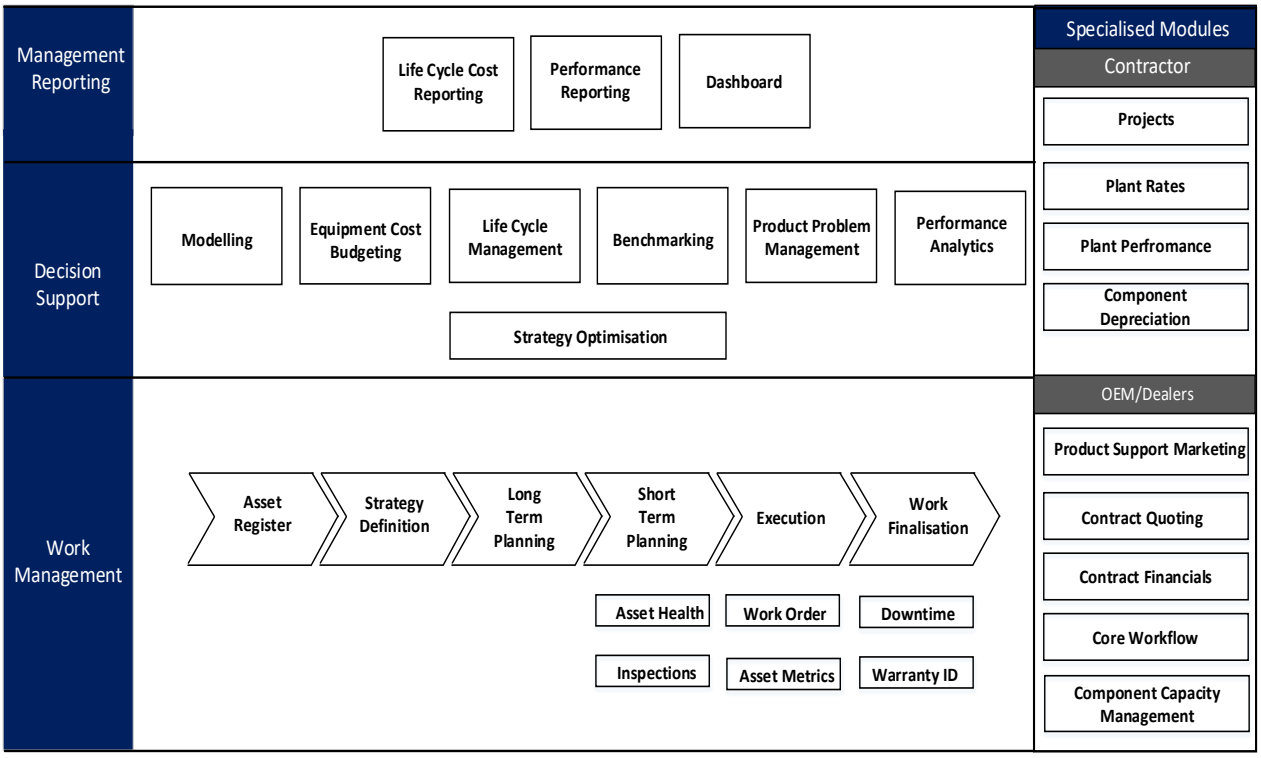

Check your understanding of the workshop and ask any related questions.

Course Outline

Prerequisites	None
Target Audience	AMT users
Nominal Duration	4 Hours
Course Objectives	This course aims to equip participants with the required knowledge and skills to use AMT.
Learning Outcomes	At the end of the course, participants will have learned to: • Log in • Navigation o Use the Function Navigator o Set up My Favourites o Use the Equipment Navigator o Understand the Filters o Copy Data • Run reports and forms
Assessment Strategy	The completion of workshop tasks.
AMT version	8.26

Introduction to AMT

AMT is a comprehensive asset management system consisting of integrated modules as depicted below.

Training Workshops

1. Logging In

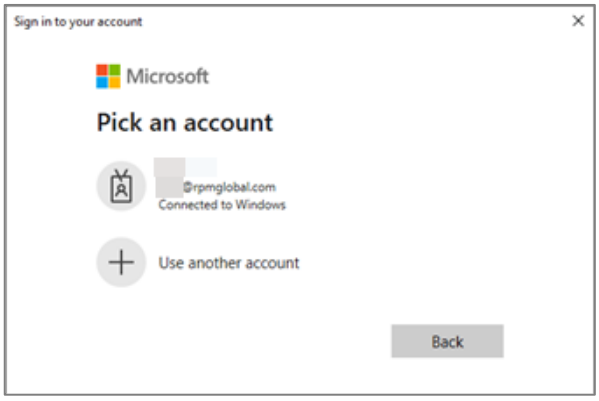

Procedure – Logging In

1. Click the AMT shortcut on the desktop or taskbar.

2. Navigate to **AMT** from the Program Menu.
3. Enter your user **Name** and **Password**.
4. Click **OK**.

If Microsoft Entra ID authentication is used, a new login screen displays.

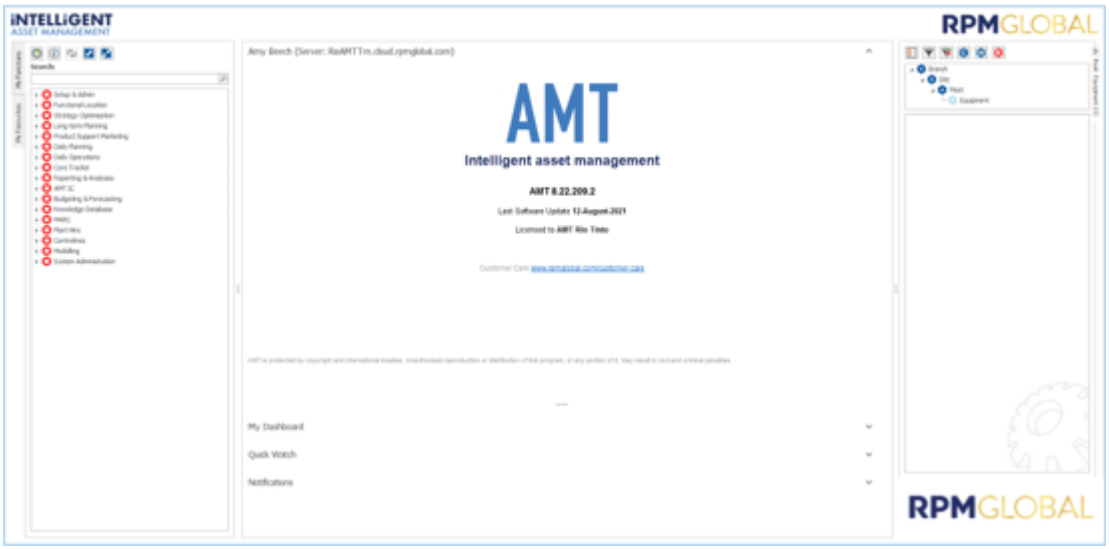

2. Navigation

Overview

The AMT home screen displays. It has three main areas:

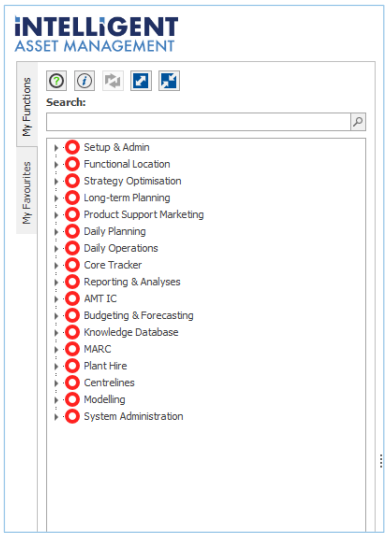

- **Function Navigator:** Lists all functions for which you have permissions.
- **Information Panel:** Displays information about the AMT version. As you select a function, this pane displays a description of the function. You can also access **Dashboard**, **Quick Watch** and **Notifications** from here.
- **Equipment Navigator:** Displays all selected equipment you can access when the filter has been applied.

Within the Function Navigator:

- **My Functions:** Access your functionality.
- **My Favourites:** Customise the functional hierarchy list, such as adding the functions you use most often.

For information on how to set **My Favourites**, review the Set up My Favourites section in this document.

The Function Navigator icons are listed in the table below.

Icon	Function
	Menu Header
	Sub-Menu Header
	Working Screen
	Report (with / without filters)
	Sub Menu contracted
	Sub Menu expanded

AMT Button Legend

AMT uses a standard set of icons to help you navigate the program.

Button	Description
or	Save changes and Close.
	Cancel and/or Close.
or	Apply Filter (apply search criteria) to Table.
or	Clear/Cancel Filters.
	Add new record.
or	Edit existing record.
or	Delete existing record.
	Apply Filter.

	Change to Standard/Siblings Mode.
	Report Preview.
	Export Data.
	Refresh Screen/Data.
	Quick Links Menu.
 or 	Help.
	System Administration.

Learning Check

Check your understanding of the workshop and ask any related questions.

Notes

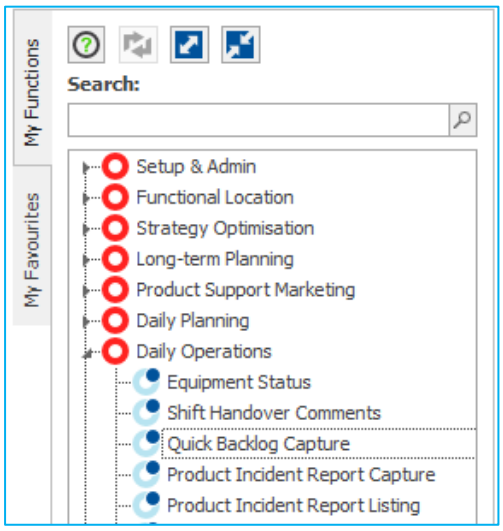

3. Search and Filter Data in AMT

Overview

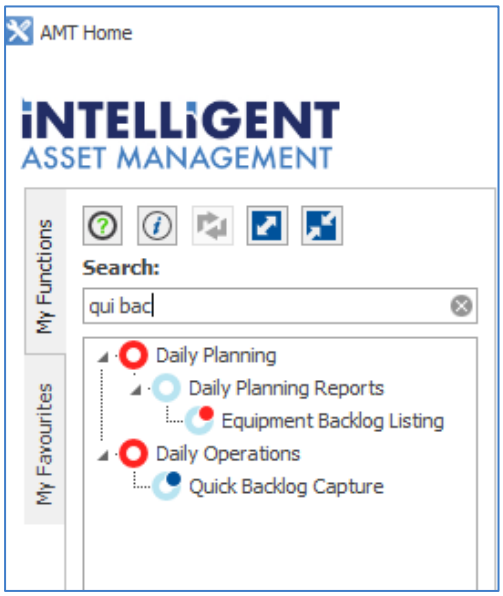

You can launch functions and reports from **My Functions**. You can view assets for which you have access or asset information using the **Equipment Navigator**.

Function Navigator

You can search for specific functions and reports using the **Search** field. Find the required function by drilling down into the branch structure. For example, to access the quick backlog capture function, double-click **Quick Backlog Capture**.

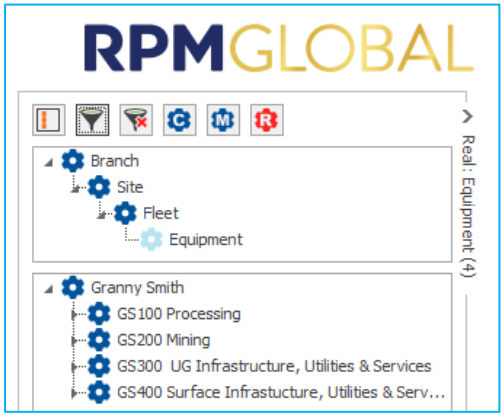

Alternatively, you can find functions and reports using the **Search** box. Type the name, or part of the name, of the function or report that you're searching for.

Equipment Navigator

The Equipment Navigator displays a list of assets or asset information to help you launch reports quickly.

Asset information is shown in two ways – by category or by equipment hierarchy.

Group by various categories (Fleet, Model, Site, and so on). Filters are then available to limit the results:

- **Group by** – How the data is grouped.
- **Equipment Hierarchy** – These filters give you the flexibility to specifically limit the data that displays in the reports.

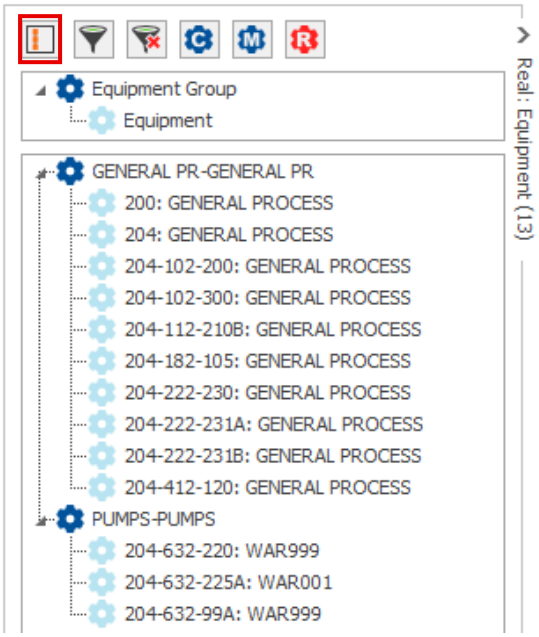

To begin using the Equipment Navigator, click **Filter**.

Examples

If you group by **branch**, **site**, or **fleet**, a list of equipment in each fleet displays. If you group by **manufacturer**, **model**, or **region**, a list of equipment models at each region displays. Highlighting an asset before launching a report automatically populates the report launcher with the details of that asset.

LISTING PARENT AND CHILD ASSETS

1. Click **Change to Standard/Siblings Mode**. The **Equipment Selector** displays.

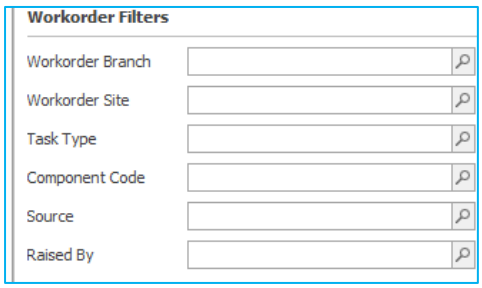

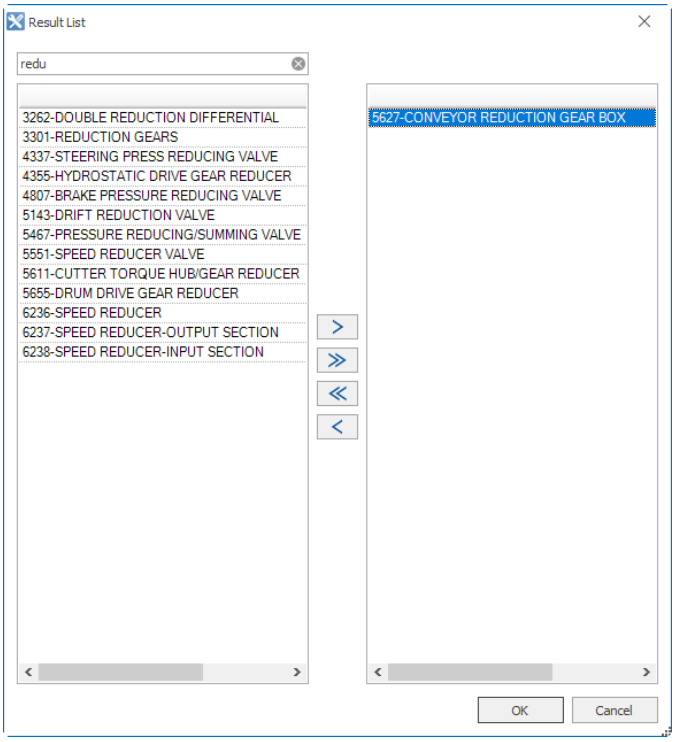

2. You can choose specific parent equipment to display.

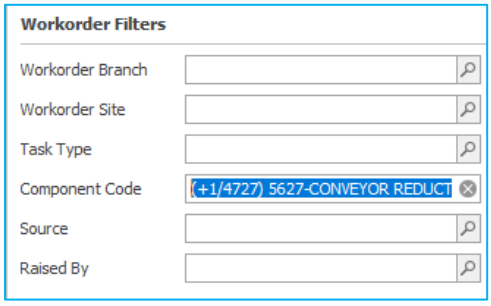

Procedure - Using Filters

Filters are used in AMT to specify data selections. Some filters allow you to select only one record; other multi-select filters allow you to select multiple records.

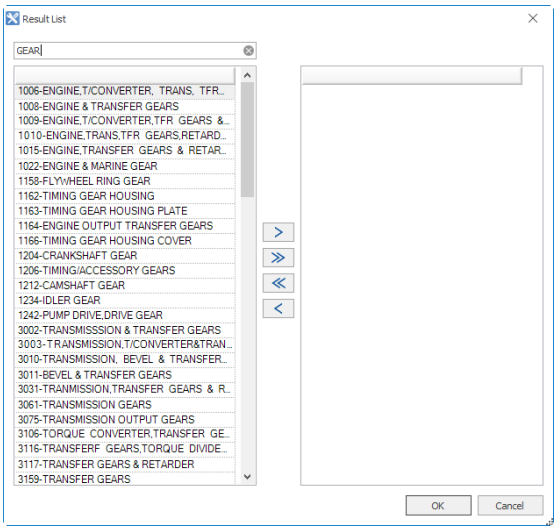

1. Click the **Magnifying Glass** to open the **Result List**.
    - If the results list is a single-selection box, select from the list and click **OK**.

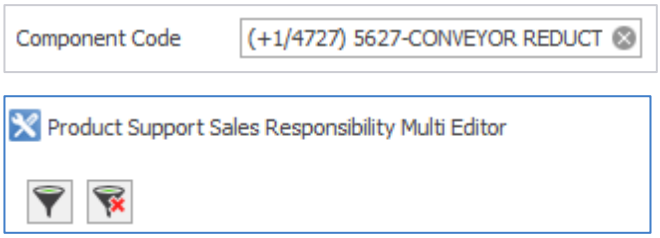

- If the results list is a multi-selection box, use the arrows to move your selection into the right box.

>	Shifts only selected results to the selected option (right side) box.
>>	Shifts all results to the selected option (right side) box.
<<	Shifts all selected results back to the (left side) results box.
<	Shifts only selected results back to the (left side) results box.

Shift the required selection to the right box and click **OK** to confirm the selection.

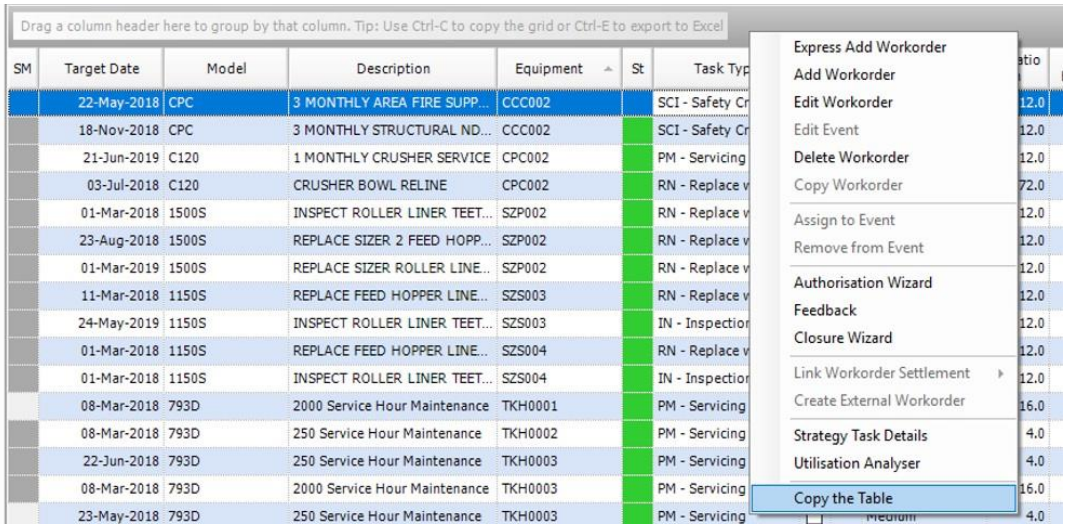

- If you want to change your selection, clear the current selection by clicking **Clear Filters** before you open the results list. You can do this in either an individual field or for the entire range of filters.

Procedure - Copying Data to other programs

In some grids in AMT, you can copy the data and export it to other programs, such as Microsoft Excel.

Right-click anywhere on the grid, select **Copy the Table**, and paste the data into the third-party program.

Paste the data using the **Ctrl+V** keys on the keyboard OR right-click on the program and select **Paste**.

*Some grids in AMT that let you paste data directly into them (for example, the function **Record Actual Usages**). Grids that have this capability display the option **Paste**.*

*To create an Excel file on your computer containing data from the table, press the **Ctrl+E** keys on the keyboard.*

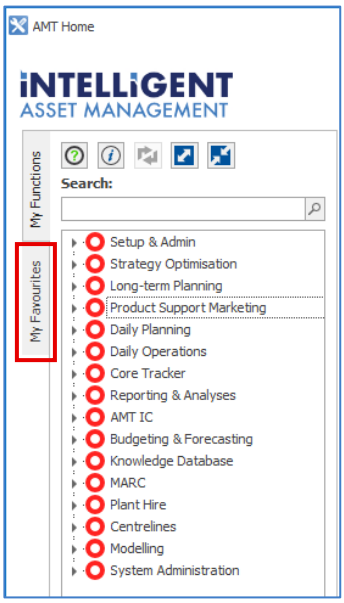

Set Up My Favourites

The **My Favourites** section in the **Function Navigator** allows you to customise the functionalities that you want to access more frequently.

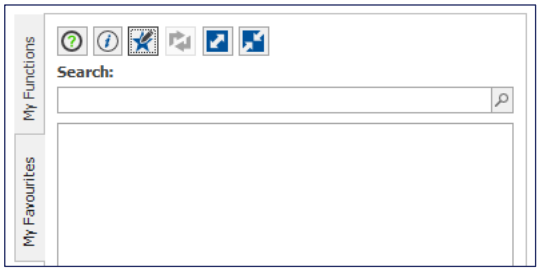

Procedure – Set Up My Favourites

Perform the following steps to set up **My Favourites** in AMT:

1. Click **My Favourites**.

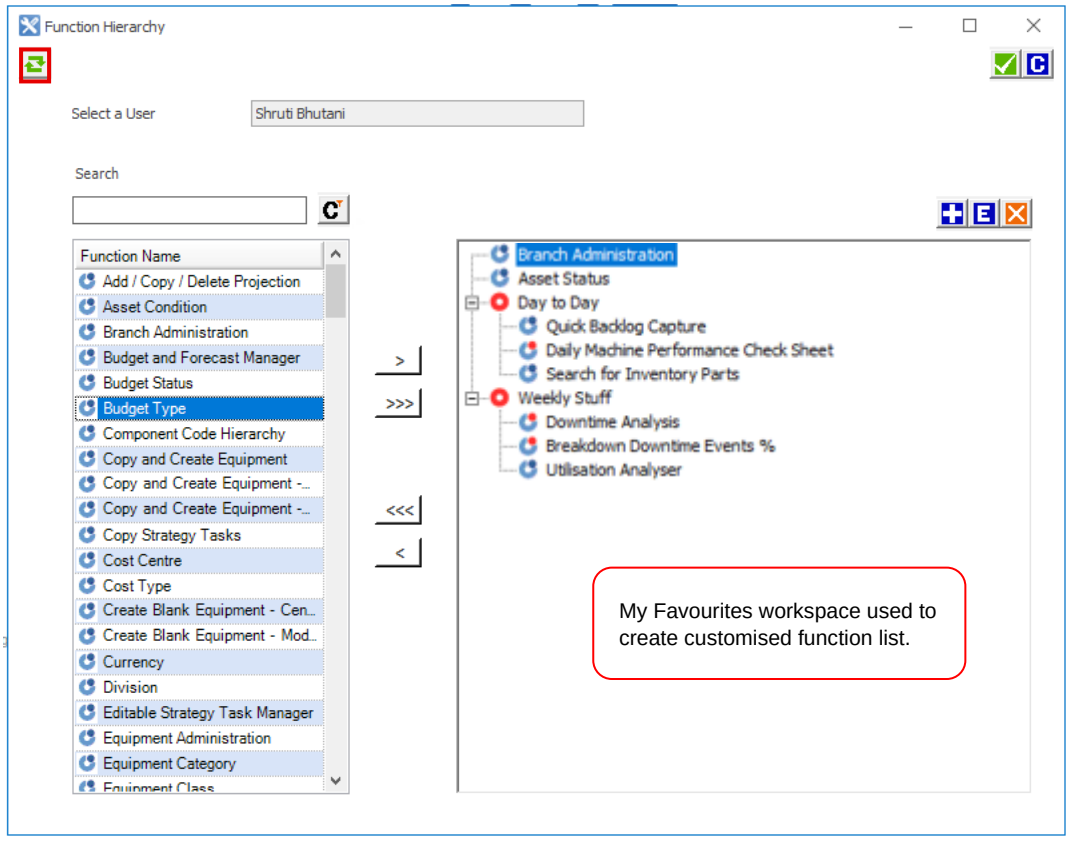

2. Click **Edit**.

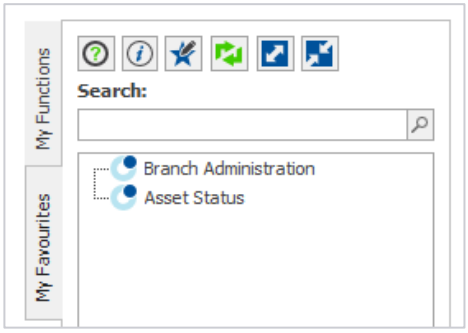

3. On the **Function Hierarchy** dialog, perform the following actions:

   - Click **Refresh**.
   - To create a custom node or folder, click **Add**:
     - Add a title.
     - Select the new node or folder and double-click the function to move it into the node.
     - Right-click the custom node to edit, add or delete functions.
   - Click **Edit** and **Delete** to modify the custom node/hierarchy.
   - Select the function name and click the arrows to include or exclude functions in **My Favourites**. You can also double-click to add the functions.
   - Click **Save and Close**.

4. Click **Save & Close**.
5. Click **Refresh**.

Learning Check

Check your understanding of the workshop and ask any related questions.

Notes

4. Run Reports in AMT

Overview

AMT has reports that you can use to assess all aspects of your business and maintenance strategy, create operational and financial forecasts, and report on KPIs.

Reports display in the Navigation window with a red addition to the icon. Double-clicking a report icon opens a **Report Parameters** dialog with numerous filters. Use these filters to ensure the report returns the specific data you require.

Highlight a fleet, model or equipment plan in the **Equipment Navigator** before you double-click the report to automatically populate the form filters with that highlighted selection.

Key Concepts

- **Analyse by**: Defines the categories or classifications for displaying the data.
- **Group by**: How the data is grouped.
- **Filter**: The filters allow you to limit the data displayed in the reports.

Procedure – Run Reports in AMT

Perform the following steps to run reports in AMT:

1. In the **My Functions** hierarchy, reports display with a **red dot** in the icon**.**
2. Select the report you want to view.

*Highlight a fleet, model or equipment plan in the **Equipment Navigator** before you double-click the report to automatically populate the form filters with that highlighted selection.*

3. The report details display in the **Information Panel**. The **Description** and **Tips** provide additional helpful information about the report.

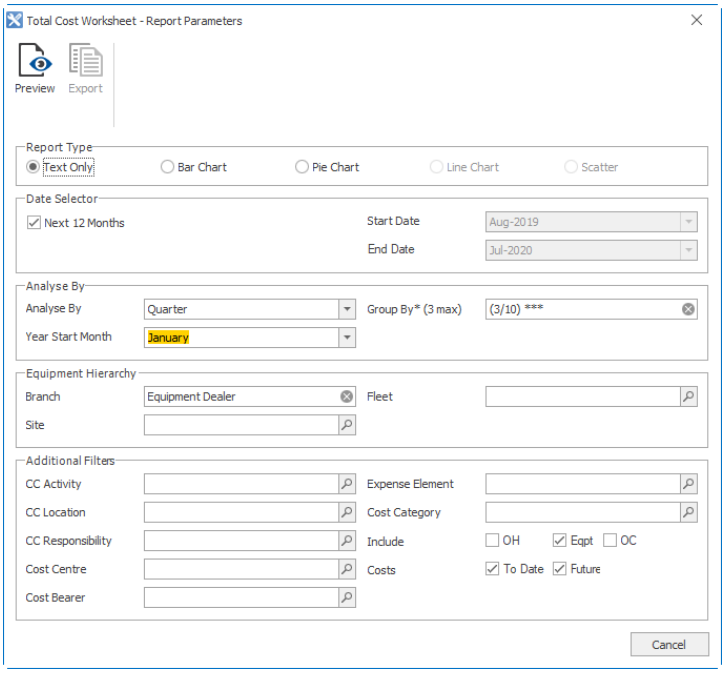

*You can also double-click the report name from the **My Functions** hierarchy to run it. In this case, the report description will not be displayed.*

Example

In this example, we want to determine the quarterly equipment costs for a particular fleet for the next 12 months by running the **Total Cost Worksheet** report. Note the filter selections:

- **Analyse By**: Quarter
- **Group By**: (3/10)
- **Branch**: Equipment Dealer
- Click **Preview** to generate a **Total Cost** report similar to the one shown below.

OH (Overheads) and OC (Other Costs) are not included in this report query. .

Total Cost Worksheet

Hierarchy [Branch: Equipment Dealer]
Additional Filters [Include:Eqpt] [Costs:To Date,Future] [Currency: USD (US Dollars)]
Date Range [Aug-2019 - Jul-2020] (Year Start Month: January)

Branch	Site	Fleet	2019-Q3	2019-Q4	2020-Q1	2020-Q2	2020-Q3	Total
Equipment Dealer	CSA	CSA Customer	31,930	43,643	55,387	46,496	18,744	**196,200**
	Customer Owned	Customer Haul	109,945	390,248	555,378	620,273	149,858	**1,825,700**
	MARC	MARC Haul	1,174,835	462,201	846,534	197,203	160,845	**2,841,618**
		MARC Support	26,506	40,529	170,615	35,996	11,923	**285,569**
	Power systems	Prime Power	5,400	8,100	8,100	8,100	2,700	**32,400**
	Rental	Rental Customer	1,096,552	537,107	340,370	582,374	525,506	**3,081,909**
Total			**2,445,168**	**1,481,827**	**1,976,385**	**1,490,442**	**869,575**	**8,263,396**

Learning Check

Check your understanding of the workshop and ask any related questions.

Notes

5. Run Forms in AMT

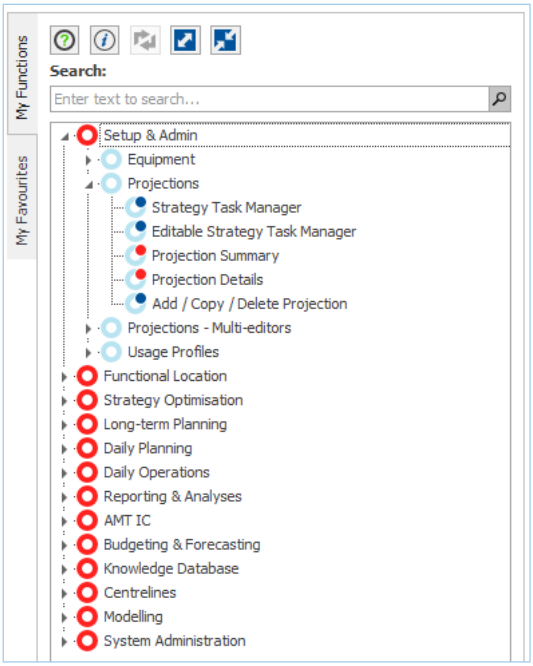

Functionality Overview

Forms are screens where you can enter parameters based on what AMT will generate or pull out relevant data for reports.

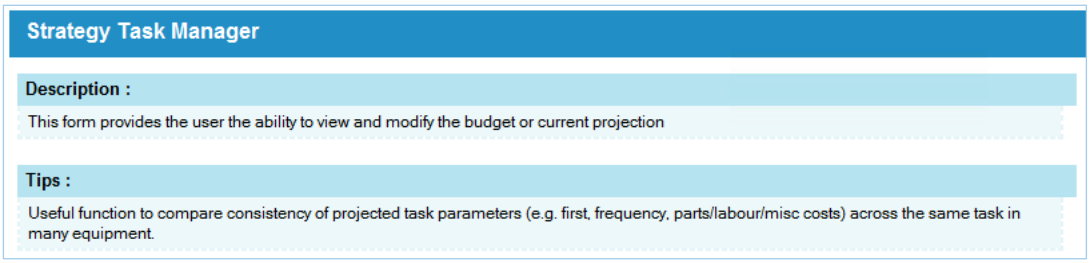

Procedure

Perform the following steps to run forms in AMT:

1. In the **My Functions** hierarchy, forms display with a **blue dot** in the icon**.**

2. The form details display in the **Information Panel**. The **Description** and **Tips** provide additional helpful information about the form.

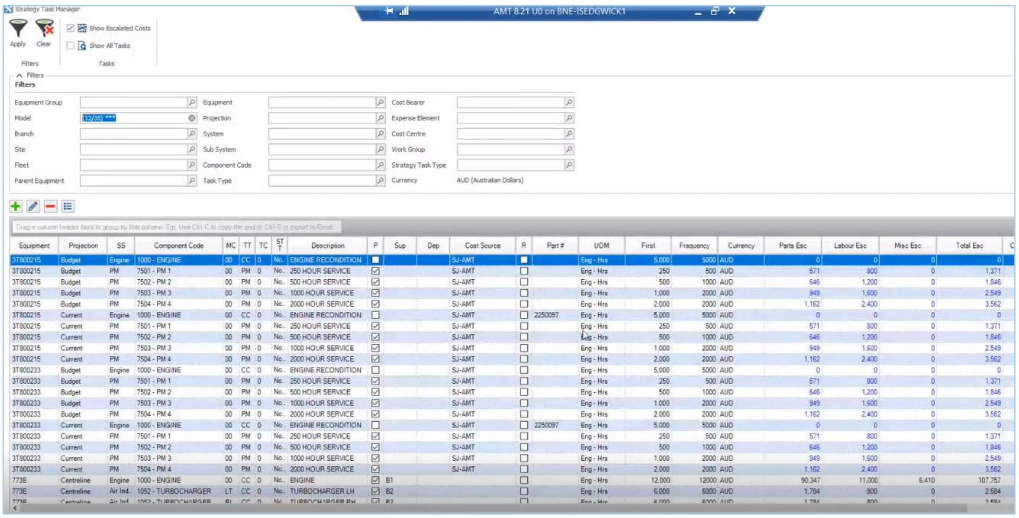

*You can also double-click the form name from the **My Functions** hierarchy to run it. In this case, the form description will not display.*

3. The corresponding form dialog displays.

   - Select the relevant filters.
   - Click **Apply Filter**.

4. A table with relevant data as per the applied filters displays. Click the small arrow above **Filters** to minimise the selection panel and give more space to read the data.

*To export the data to a Microsoft Excel file, refer the steps in the **Copying data to other programs** section.*

Learning Check

Check your understanding of the workshop and ask any related questions.

Notes

6. Summary

Summary

The key points to remember from this training manual are:

- You can access AMT directly from the application shortcut as a registered user.
- You can access functions, reports, and assets and/or asset information from **My Functions** and **Equipment Navigator**, respectively.
- You can export data to third-party programs, such as Microsoft Excel.
- You can set up **My Favourites** to show the functions that you use most often.
- You can run reports and forms in AMT.
