Mobile Hose Workshop

For easy and convenient service of hydraulic hoses.

- On worksites with rigs and other equipment to service there is always a need for maintenance of hydraulic hoses. This can easily be made using the Mobile Hose Workshop, which contains all the tools necessary for assembling hydraulic hoses with 1-6 reinforcement layers of steel wire.

- Base in the Workshop is the hose assembly center, a complete hose mounting workbench, designed to fulfil all your needs for a safe and professional hose assembly.

- The center is delivered with a hose reel, cutting machine, skiving machine, marking machine, hose cleaning equipment and hose swage. The center is delivered with all the necessary accessories.

- This is a 20 ft ISO standard, steel container, internally insulated and fitted with a non-slip aluminum floor plating. One end of the container has two main doors that open completely. One side of the container has a window with steel shutter.

- The container is equipped with electric heating and has a complete electric and compressed air line system for immediate connection to electrical and pneumatic power sources.

- Base sockets have been provided for transportation with forklift truck. External dimensions 6.0 x 2.5 x 2.6m. Weight incl. standard equipment, approx. 3000kg. The Mobile Hose Workshop is delivered for 230V/50Hz and 380V/50Hz. Other voltages can be supplied on request

Mobile Hose Workshop

Fully equipped for a safe and professional hose assembly

Part No. 3219 0001 42

Including the following equipment:

- Workbench (2 m long) with right and left side consoles,removable vice and lockable pedestal.
- Crimper machine complete for hose from 3/16 " to 2 "
- Cutting machine with standard blade.
- Skiving machine complete for hose up to 2 “
- Swaging mandrel set 3/16"-2“
- Swaging mandrel set 3/8"-2" Interlock couplings
- Marking machine, manual, with 4 mm die set and a two row/lines holder and one cartridge set.
- Hose cleaning system
- Hose reel

The Mobile Hose Workshop also includes a number of accessories such as tool hooks, plastic boxes, lighting, swage table holder, measuring rail (2 m), and a set of all required screws.
Also included is a tool set containing: Plastic hammer, screwdriver set, 4, 5 and 6 mm, wrench, wire cutters, protractor, oil can and metal saw.

Crimper machine complete

Highlights in mobile Hose workshop

Crimper machine is a very robust machine ideally suited for smaller service facilities.

TECHNICAL DATA

Crimping range in mm: 10 - 87 mm
Crimping range in inches: 0,39 - 3,42
Crimping force in metric tons: 200
Crimping force in kN: 2000
Maximum hose size in inches: 2“

Die set Rack

Cutting machine

Highlights in mobile Hose workshop

A manually operated cutting machine designed for smaller workshops and service vans.

It has a robust construction, is highly reliable and easy to use.

There are three different motor alternatives to choose from: 12V, 230V single phase and 230/400/460V 3-phase.

The machine is prepared with a smoke evacuation connection and it's suitable for braided hoses up to 2".

Skiving machine complete

Highlights in mobile Hose workshop

For efficient skiving of hydraulic hoses (external and internal) from dimensions 3/16" to 2".

The machine is easily controlled by a foot pedal. With a bin for rubber waste

Tools for skiving

Cleaning machine

Highlights in mobile Hose workshop

For a quick and effective cleaning of hoses and tubes.

The e-cleaner system uses a foam plug which is propelled through the hose/tube by compressed air and the outer diameter of the plug is approximately 20% larger than the inner diameter of the hose/tube.

The e-cleaner Maxi pistol is very robust and sturdy. It is suitable for hoses up to 2" and tubes up to an ID of 60 mm.

HoseReel 1

Highlights in mobile Hose workshop

This one-stage hose reel is designed for hoses and cables.

This table is adjustable to fit the center of the coil.

It should preferably be placed 1-1,5 meters from the cutting machine.

Wire-Braid Hydraulic hose assemblies

Construction

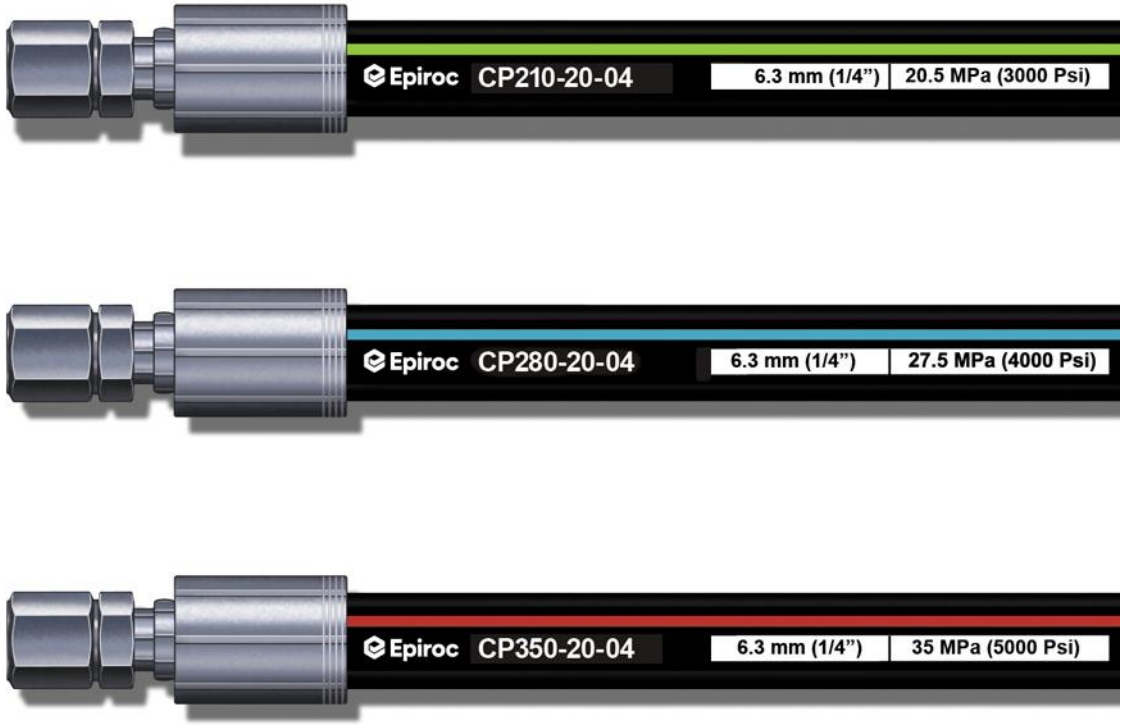

- Bend up to one-third SAE bend radius specification
- Constant working pressure in all sizes
- Two braids of high-tensile steel wire reinforcement
- Nitrile tube for use with biodegradable hydraulic fluids
- Tested to 600 000 impulse cycles
- -55°F to +212°F (-48°C to + 100°C) for all weather operation
- Available with tough abrasion-resistant covers

Spiral-Wire Hydrauic hose assemblies

Construction

- Bend up to one-half SAE bend radius specification
- Each hose features a constant working pressure
- Four alternating layers (six in some larger sizes) of spiraled, high tensile steel reinforcement
- Nitrile tube for use with biodegradable hydraulic fluids
- Tested to 1 000 000 impulse cycles
- -55°F to +250°F (-48°C to + 121°C) for all weather operation
- Available with super tough abrasion-resistant covers
